The College of Physicians of Philadelphia greeted more scholars, artists, and students than ever before this year. Our increase in visitorship was due in large part to our compelling take on the personal narratives and bodily experiences of Civil War soldiers, doctors, and nurses in our new exhibition, *Broken Bodies, Suffering Spirits: Injury, Death, and Healing in Civil War Philadelphia*. The exhibition has already been well-received by visitors and the press—*The New York Times* featured an impressive half-page article on the first page of their Science section.

This year we celebrated the 225th anniversary of our Historical Medical Library with a timely discussion about the relevance of print resources in the digital age. Our Library staff continued to focus on expanding access to our significant collections through two important digitization projects—our partnership with Columbia and Yale Universities’ libraries and the launch of our digital library.

Our educational programs engaged thousands of students, particularly those under-represented in science and healthcare careers, through STEM-intensive (science, technology, engineering, and math) curricula. The entire second cohort of our award-winning Karabots Junior Fellows Program graduated from high school this year, and we look forward to hearing more about their accomplishments in college.

Our Fellows, supporters, and friends play a vital role in the growth of this institution. From serving as youth mentors to ambassadors for our mission, our programs and services are exemplary because of your support, guidance, and expertise. We are exceedingly grateful to all of our supporters who enable us to provide public access to artifacts and information that are rarely seen outside of the medical profession. Thank you for helping us to inspire curiosity about, and interest in, science and medicine.
In the Fall of 2013, the Mütter Museum opened its first new major permanent exhibition since 2003. *Broken Bodies, Suffering Spirits: Injury, Death, and Healing in Civil War Philadelphia* examines the personal experiences of soldiers, doctors, and nurses through a medical humanities lens. The College organized many related programs that further explored themes from *Broken Bodies*. Professor Natasha Trethewey, former United States Poet Laureate, read from her Pulitzer Prize-winning collection of poetry, *Native Guard*. The title poem explores the legacy of the Louisiana Native Guard, one of the first regiments of black soldiers fighting for the Union during the Civil War. We participated in a Civil War field hospital in Cheltenham Township as part of the 150th anniversary commemoration of Camp William Penn, the first and largest training camp for black soldiers during the Civil War. The College’s second annual Civil War Hospital Day was a huge success, featuring medical re-enactors and our Karabots Junior Fellows.

In May, the College announced the creation of the Mütter Institute, dedicated to scientific and museological research and consultation. The Institute will help link the historic with the contemporary by establishing collaborations and partnerships with other historic, scientific, or medical institutions with the goal of utilizing College collections to conduct research relevant to 21st century human health.

CHOLERA DNA STRAIN IDENTIFIED AT THE MÜTTER—FIRST TIME HISTORIC SPECIMEN HAS YIELDED DNA IDENTIFICATION.
In celebration of its 225th anniversary, our Historical Medical Library hosted a one-day conference and reception, *Emerging Roles for Historical Medical Libraries: Value in the Digital Age*. More than 250 people joined five distinguished speakers to explore the role of print resources and physical libraries in a growing digital age.

**Historical Medical Library**

This year we launched a digital library to share unique and rare images from our Library collection: [www.cppdigitallibrary.org](http://www.cppdigitallibrary.org). More than 1,250 images were added, with collection strengths in the history of anatomy and medical botany. The digital library also features the College’s first online exhibition, *A Philadelphia Physician Encounters the Great War*.

We also assumed the administration of a grant from the National Endowment for the Humanities to digitize American Medical History journals, with partners Columbia University Libraries/Information Services, and Yale University’s Cushing/Whitney Medical Library.

889 VOLUMES/497,636 PAGES SCANNED, AVAILABLE AT: [https://archive.org/details/collegeofphysiciansofphiladelphia](https://archive.org/details/collegeofphysiciansofphiladelphia)
Utilizing the fascinating collections of the Mütter Museum and Historical Medical Library, our Center for Education and Public Initiatives (CEPI) offers programming that celebrates the human body—both its potential and its limitations, prepares youth for fulfilling healthcare careers, and addresses community consumer health needs ranging from stress and resiliency to sexual health.

The College hosted a dance performance, which sold out both nights, that explored the synergy between the arts and sciences as we are so uniquely poised to do. Choreographer Jae Hoon Lim’s Life Between drew inspiration from the Mütter to artfully incorporate movements reminiscent of skeletal disorders.

CEPI continued to offer quality educational programming to students, focusing efforts primarily on high school students from low income families and from underserved schools. All students participating in the second cohort of our Karabots Junior Fellows Program graduated from high school with one student planning to join the Navy and the rest attending college. This intensive three-year program offers mentoring, STEM-based (Science, Technology, Engineering and Math) programming, and internships to prepare students for college and healthcare careers. The Teva Pharmaceuticals Summer Internship Program continued to focus on resiliency and coping skills, while also aligning with state science curriculum standards.
HistoryofVaccines.org (HoV) received a prestigious certification from the World Health Organization’s Global Advisory Committee on Vaccine Safety and was added to its approved vaccine information providers in Spanish.

Project Director Karie Youngdahl worked with a number of College Fellows to increase HoV public health and community education efforts. We worked with a CDC officer placed at the US Embassy in Mexico City to conduct outreach there. Youngdahl and College Trustee Thomas Fekete, MD, were guests on “Information Is the Best Medicine,” a weekly health topics radio call-in show on WURD AM, the only African American owned and operated radio station in Pennsylvania. We have also been collaborating with Fellow Harvey Rubin, MD, PhD, on his groundbreaking work on extending the vaccine cold-chain in African countries. Dr. Rubin’s group, Energize the Chain, is partnering with a Zimbabwean mobile communications company to use electrical energy at cell phone towers to power vaccine refrigerators.

Important new content was added to HistoryofVaccines.org this year, including articles on varicella, herpes zoster, and the promise of immunotherapy for cancer treatment; blog posts; and more than 100 new images in the Gallery.
The Benjamin Rush Medicinal Plant Garden underwent a major transformation during the past year. Our new Sir John Templeton Veranda provides a seamless bridge from the Mütter—a museum of once-living objects—to the garden, a complementary living exhibit that showcases the importance of plants to our health. Through our garden, we help visitors understand the historical sources of medicinal remedies, and our plants have fascinating stories to tell. Visitors learn, for instance, that foxglove is the source of the early cardiac “wonder drug” Digitalis or that pennyroyal was advocated as a plague repellent in the Middle Ages.

Building on two generous gifts received in December 2013, an endowment fund has been established to ensure that this beautiful urban oasis remains for years to come.

Our Fellowship

The College of Physicians of Philadelphia welcomed the following new Fellows, who were elected between July 1, 2013 and June 30, 2014.

Mark Abdelmalek, MD
Geoffrey K. Aguirre, MD, PhD
Brenda L. Banwell, MD
Esther D. Chernak, MD, MPH
Emily F. Conant, MD
Christopher M. Fecarotta, MD
Scott J. Fudemberg, MD
Kenneth D. Goldblum, MD
Marianne Hamel, MD, PhD
Beverly L. Hershey, MD
Stephen W. Holt, MBA
Frances E. Jensen, MD
Saurabh Jha, MD
Paul M. Katz, MD
John H. Krouse, MD, PhD
Vera P. Krymskaya, PhD, MBA
Lawrence S. Levin, MD, FACS
Dale M. Mandel, MD, MMM
Anand V. Mantravadi, MD
Helen P. Pudlin, JD
Mindy G. Schuster, MD, MSCE
William R. Sigmund, MD, MHS
Anthony J. Silvagni, DO, Pharm D
Arun K. Srinivasan, MD
George H. Steele, MD
